To the Parent/Guardian of Incoming Twelfth Grade Students;

The Ohio Department of Health has revised the immunizations requirements. All students entering the 12<sup>th</sup> grade are required to have two doses of Meningococcal vaccine prior to the start of school. However, if the student received their first dose after their 16<sup>th</sup> birthday then just one dose of Meningococcal is required.

Please arrange for your child to have this immunization through your doctor or the health department.  
**Verification of the immunization must be sent prior to the start of school using this form or other appropriate documentation (i.e. copy of immunization record).**
